Engineering

Projects

inu (QDMS)

🌐 <https://github.com/team-inu>

Inu is QMS (Quality Management System) that craft for the Computer Engineering department of KMUTT. This application will keep track the student from the new comer along with the graduator and also keep track of courses, assignment and lecturer, to make sure that everything that we track will pass the threshold of quality by TABEE. The backend written in GoLang, and frontend in NextJS.

KMUTT Confirmation for Studying Agreement System

One of the external projects from the admission and recruitment office of KMUTT, This application helps the KMUTT newcomer to verify their admission data and upload their proof of payment and studying agreement contract to the KMUTT. I do all development to deployment with my team.

Mod-Tham-Ngarn

🌐 <https://github.com/riflowth/mod-tham-ngarn>

Mod-Tham-Ngarn is a web application for machine maintenance and error logging. I do back-end and front-end with my team. This application builds on a custom express server with an OOP code base.

Finger-Monster

🌐 <https://github.com/eltfshr/finger-monster>

Finger monster is a game that uses sign language as a weapon to kill monsters. No game engine or game framework involves, Just the HTML canvas from scratch. I do the hand-tracking part of the game.
